Engineering Change Items Preview

Purpose

T-con vendor announced end-of-life plan. Considering supply longevity and stability, ADP's ultimate assessment with new material will lead to change of PCBA layout.

Change Preview

	G150XTN06.800
PCBA	• Change T-con (EOL) • Change PWM/ OP/ DVCOM
BLU	• Vendor Change

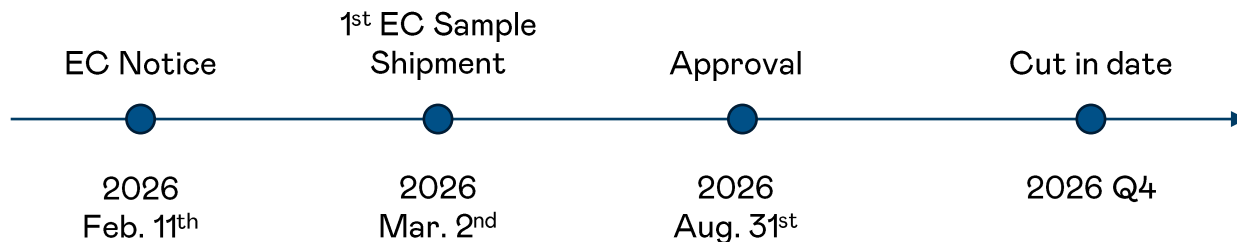

Model Name	Part No. after EC	Part No. before EC
G150XTN06.8	97.15G16.802	97.15G16.800

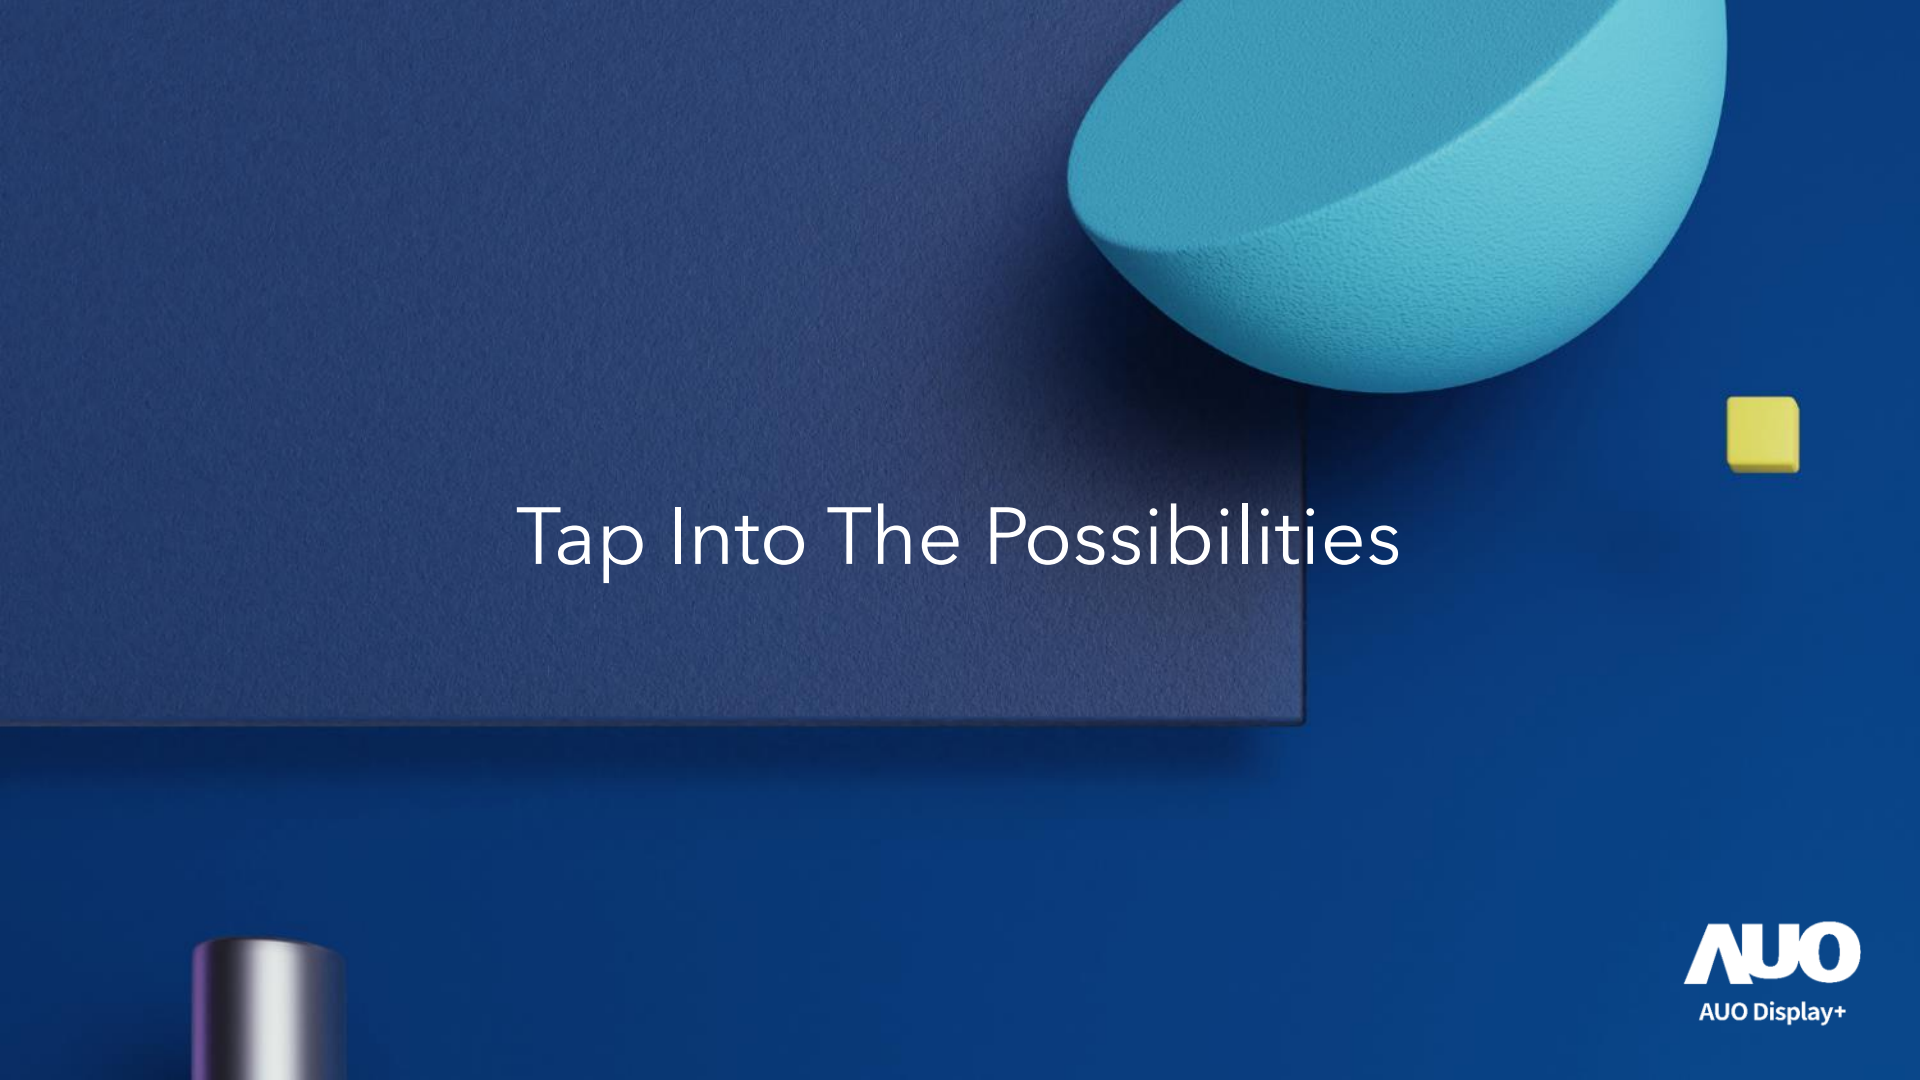

Engineering Change Schedule

Notes

- Internal reliability verification has been done, and all mandatory items are passed
- 1st EC sample: available by Feb 28th. Suggested verification period: within 6 months
- Recommendation: Implement new T-con by “Cut-in”
- The actual cut-in date will depend on the approval release date. Due to the current market shortage of raw materials (such as gold and copper), the expected lead time is 10–12 weeks. Therefore, ADP strongly recommend starting the verification process as early as possible
